PROJECT

1. Video Searching Website Github

- Made the sign in/ sign up page. In the signed in page there is a search bar with voice search option, it searches videos using Youtube API. Also users can store keywords. Firebase is used as the backend and for authentication.

- TechStack used:HTML, CSS, Javascript, Firebase

2. Backend for Ecommerce

- Made a server using Express, connected the database(mongoDB) and one can create, read, update and delete data from the database. Errors are handled.

- TechStack used:NodeJS, ExpressJS, MongoDB
